Re: Jerry Dennis

Donald,

I wanted to extend my sincere appreciation for your prompt response on Saturday, January 17. One of our customers' central plants went under two feet of water and we were given the challenge of getting it up and running before the day was over. I was in need of an electrician to assist in this repair/recovery project and Jerry Dennis arrived with a positive can do attitude. He quickly assessed the electrical situation and went to work. He checked all electrical items that had been submerged and discovered the wires going from the MCC panel to the sump pumps had shorted. He pulled new wire and had the pumps running in no time. Jerry wasted no time moving from project to project. I am very grateful for all of his hard work, and I would like to thank Jerry Dennis for his assistance in this project. We could not have done this with out you. Please thank Jerry for me and let him know that his efforts are recognized and appreciated.

Sincerely,

**TDIndustries**
